SUMMARY

Front-End Developer with **4 years of experience** in designing and developing scalable, high-performance web applications using **React.js, JavaScript (ES6+), HTML5, and CSS3**. Experienced in building reusable component architectures, integrating RESTful APIs, and optimizing application performance for enterprise-grade fleet and trip management systems. Adept at leveraging modern UI frameworks and AI-assisted development tools to deliver responsive, production-ready solutions in Agile environments.

TECHNICAL SKILLS

- **Languages:** HTML5, CSS3, JavaScript (ES6+)
- **Frameworks / Libraries:** React Js, Bootstrap, Material UI, Tailwind CSS
- **Tools:** VS Code, Git, GitHub, Postman, Chrome DevTools
- **Platforms:** Web Applications, Windows, Vercel
- **Others:** Responsive Design , On-Page SEO , Web Performance
- **Soft Skills:** Problem Solving, Team Collaboration, Communication, Adaptability, Time Management, Attention to Detail

AI DEVELOPMENT TOOLS

- **AI Tools:** ChatGPT (OpenAI GPT), GitHub Copilot, Google AI Studio, Grok, Cloud etc
- **Usage:** Code generation, debugging, API design assistance, performance optimization, UI/UX improvement, documentation automation

EXPERIENCE

- **Trans Global Geomatics Pvt Ltd** Hyderabad
Front-End Developer 2022 – Present
 - Working as a Front-End Developer specializing in React.js, developing and maintaining 15+ scalable and responsive web applications for fleet tracking, trip management, and enterprise monitoring systems.
 - Designed reusable component architectures, integrated RESTful APIs using Fetch and Axios, and optimized performance through lazy loading, code splitting, and efficient state management, improving load time by 40%.
 - Collaborated with backend teams to deliver seamless API-driven interfaces while leveraging AI-assisted development tools like GitHub Copilot and ChatGPT to enhance productivity and code quality.
- **DDUGKY** Vijayawada
Web Developer Intern Feb 2022 – July 2022
 - Completed a Web Development internship focused on building responsive applications using HTML5, CSS3, JavaScript, and React with cross-browser compatibility.
 - Implemented dynamic UI features, form validations, and API integrations while gaining hands-on experience in debugging and frontend performance optimization.

PROJECTS

- **Fleet Management System**
 - A scalable web-based fleet management platform developed using React.js to monitor vehicles, drivers, and real-time status updates through REST API integrations. The system includes dynamic dashboards, advanced filtering, reporting features, and performance optimization using reusable component architecture and AI-assisted development tools.
- **Trip Management System**
 - An interactive trip planning and tracking application built with React.js, Leaflet, and Google Maps for real-time route visualization and monitoring. The platform integrates REST APIs and leverages AI tools like ChatGPT, GitHub Copilot, and Google AI Studio to enhance route logic, API handling, and frontend performance.
- **Coal Mining Website**
 - A modern, responsive industry website developed using React.js and Tailwind CSS to showcase mining services, fleet infrastructure, and product listings. The platform focuses on performance optimization, cross-browser compatibility, and structured UI components with SEO best practices.
- **IoT Solution Website**
 - A responsive IoT solutions platform designed with React.js and Tailwind CSS featuring real-time monitoring dashboards and GPS tracking interfaces. AI-assisted development workflows using ChatGPT, GitHub Copilot, and Grok Cloud were utilized to improve UI development speed and debugging efficiency.

- **School Management System**
- A responsive academic management system built using HTML5, CSS3, and JavaScript to manage student records and administrative workflows. The application includes dynamic forms, validation mechanisms, and intuitive UI design to enhance overall usability.
- **Beauty Parlor Website**
- A modern business website developed using HTML, CSS, JavaScript, and Bootstrap with a focus on responsive design and user engagement. Improved booking conversions by 25% through enhanced UI/UX design and optimized layout structure.

ACHIEVEMENTS

- Successfully delivered 10+ client projects within deadlines while maintaining high UI/UX standards.
- Recognized by team leads for building reusable React components that reduced development time by 30%.
- Implemented real-time vehicle tracking and trip monitoring features using Leaflet and REST APIs.

HOBBIES

- Drawing and creative sketching.
- Watching technology-related content and learning about new tools.
- Listening to music and exploring different genres.
- Playing outdoor games and staying active.
